

Weekly study order — Thu Sep 24 → Thu Oct 8 cluster (FA26)

For: Arshia Nasr · America/Phoenix (Arizona MST, UTC-7, no daylight saving)

Generated: 2026-09-24 afternoon (Arizona) · **Reviewed:** 2026-09-24 evening by Claude Opus 5.5 (see "Review changes" at the bottom)

Horizon: ~14 days through the Oct 8 exam cluster (335 Midterm + 345 Exam 1). Tue Oct 13 and finals Dec 14–16 appear only as horizon notes.

Rules: Never invent quiz/test dates. Never schedule study during class blocks. Prefer sooner deadlines. When no nearer deadline conflicts, class-day prep order is **252 → 335 → 345 → 337 → 380**.

Sources: `start-here-assessment-facts.md` · `_meta/assessment-inventory-2026-09-24.md` · `tracker assignments.csv` · topic maps.

Where this lives: private GitHub repo `begoneBOT/bob-jeff` → `study-guides/` (mirror of the Munch box copy).

Time zone note. Every time here is Arizona time. Some upstream notes say "PT". PT and Arizona match only until **Sun Nov 1, 2026**; after that, PT is 1 hour behind Arizona. Never convert these times as if they were PT.

Class blocks (DO NOT study during these) — Tue/Thu through Dec 9

Course	Arizona time	Room (from topic maps)
CSC 252	9:30–10:45 AM	Gittings 201
CSC 335	12:30–1:45 PM	Commons 305
CSC 345	2:00–3:15 PM	Commons 305
CSC 337	3:30–4:45 PM	Commons 305
CSC 380	5:00–6:15 PM	M Pacheco ILC 130

Usable Tue/Thu windows: before 9:30 AM, **10:45 AM–12:30 PM** (the only daytime block longer than 15 minutes), and after 6:15 PM. The 1:45–2:00, 3:15–3:30, and 4:45–5:00 gaps are walking time, not study or submission time. Mon/Wed/Fri and weekends are open.

Consequence for deadlines: anything due on a Tue/Thu afternoon or early evening (337 A4 at 3:30 PM, 252 HW2 at 7:00 PM) must be **done the night before**. The 10:45–12:30 window is the only backup.

Priority stack (soonest first)

1. **CSC 345 HW2** — primary due was Thu Sep 24 2:00 PM; **late window through Sat Sep 26 2:00 PM** (tracker still No Submission at 14:03 audit).
2. **CSC 337 A4** — Tue Sep 29 **3:30 PM** (Gradescope / tracker). **Target: submit Mon Sep 28 night.**
3. **CSC 252 HW2** — Tue Sep 29 **7:00 PM. Target: submit Mon Sep 28 night.** 6:15–7:00 PM Tue is too short for real work.
4. **CSC 380 HW03 + HW03 Code** — Tue Sep 29 **11:59 PM** (both items). Target: nearly done Mon night; submit Tue after 6:15 PM.
5. **CSC 252 Asm 2** — Wed Sep 30. Time conflict: 5:00 PM (PDF) vs 7:00 PM (GS/homepage). Finish by **5:00 PM.**
6. **CSC 252 Test 2** — Thu Oct 1 (confirmed date; clock NV; ~25 min likely). Guide: [csc252/assessments/CSC 252 – Test 2 Study Guide.md](#).
7. **CSC 337 Midterm 1** — Tue Oct 6 (confirmed date; 75 min per inventory; 3:30–4:45 if in class). Guide: [csc337/assessments/CSC 337 – Midterm 1 Study Guide.md](#).
8. **CSC 252 Sim 3** — Wed Oct 7 **7:00 PM** (confirmed, homepage). ALU project; **no AI help.** Size unknown. **Target: submit Tue Oct 6 night**, so the night before two exams stays light.
9. **CSC 335 Midterm + CSC 345 Exam 1** — both Thu Oct 8 (confirmed dates; clocks NV). Back-to-back if both are in class (12:30 and 2:00, same room). Guides under [csc335/](#) and [csc345/assessments/](#).
10. **CSC 380 Quiz 04** — **scope confirmed** (Bayes / LOTP / independence, slides 43–68); **due datetime NV.** Check Gradescope/D2L Mon and Thu evenings. Do not invent a Tuesday due.
11. Later (outside this 14-day plan): the Tue Oct 13 deadline stack (see horizon), 252 Test 3 Oct 15, 380 Midterm tentatively Oct 20 (**date-NV**), finals Dec 14–16.

Daily load at a glance

"Core" means do it even on a bad day. "Bank-ahead" means do it only if that day's deadlines are on track; every bank-ahead block done now makes Oct 2–5 lighter. Minutes are study only and exclude homework/project time.

Day	Hard deadlines (Arizona)	Core study	Bank-ahead (optional)	Core min
Thu Sep 24 (after 6:15 PM)	— (345 HW2 late window open)	345 HW2	252 binary triage 35 · 335 UML 15 · 380 LOTP 15	0 + HW2
Fri Sep 25	—	345 HW2 finish · 252 deep 90 · 337 A4 block	345 Topic 1 50 · 335 intro/OOP 45 · 380 Bayes table 25	90
Sat Sep 26	345 HW2 late cutoff 2:00 PM	252 MIPS deep 90 · 345 Topic 2 proofs 70 · A4	335 testing/classes2 60	160
Sun Sep 27	—	252 blind retake 70 · A4 · 252 HW2 + 380 HW03 drafting	345 Master Thm 45 · 335 lambdas 25 · 337 JS traps 25	70

Day	Hard deadlines (Arizona)	Core study	Bank-ahead (optional)	Core min
Mon Sep 28	— (effective deadline for A4 + 252 HW2)	252 25-min mock 50 · submit A4 + 252 HW2 · HW03 near-final	337 HTTP 40	50
Tue Sep 29 (class day)	337 A4 3:30 PM · 252 HW2 7:00 PM · 380 HW03 ×2 11:59 PM	Backup submissions in 10:45–12:30 · HW03 after 6:15	252 flash 20 · 337 R3/R4 15	0
Wed Sep 30	252 Asm 2 by 5:00 PM	252 light recall 20 · 337 HTTP/Get&Post 50	380 Mock A 15 · 335/345 flash 15 each	70
Thu Oct 1 (class day)	252 Test 2 (in class)	10:45–12:30: 337 HTML/CSS 50 · 252 T3 bullets 15	After 6:15: open Sim 3 spec + first session	65
Fri Oct 2	—	337 80 · 335 70 · 345 80 · Sim 3 session	—	230
Sat Oct 3	—	337 80 · 335 80 · 345 70 · Sim 3 session	—	230
Sun Oct 4	—	337 50-min mock (75) · 335 80 · 345 25 · Sim 3 session	—	180
Mon Oct 5	—	337 70 (first) · 335 50-min mock (70) · 345 mock (75)	—	215
Tue Oct 6 (class day)	337 Midterm 1 (3:30–4:45 if in class)	Calm 337 buffer 10 (before 9:30 or 10:45–12:30) · after 6:15: submit Sim 3 · 335 + 345 flash 15 each	—	40
Wed Oct 7	252 Sim 3 7:00 PM (hard)	335 light 35 · 345 light 35 · sleep	—	70
Thu Oct 8 (class day)	335 Midterm · 345 Exam 1	Calm buffers before 9:30 or 10:45–12:30 only	—	20

Is the time enough? - 252 Test 2: about 6.5 hours of core + light study, plus HW2 (same skills). Enough if the Fri/Sat deep blocks happen. Never drop the Mon mock. - **337 Midterm 1:** almost 7 focused hours (about 405 minutes) from Wed Sep 30 to Mon Oct 5. Adequate. JS/DOM is the thinnest area, so re-weight Monday if the Sunday mock shows JS misses. - **335 Midterm:** about 5 core hours (Oct 2–5), plus 2.5–3 bank-ahead hours. Adequate only if the syllabus-only topics (generics, collections, JavaFX/patterns) get real lecture notes by Sun Oct 4. - **345 Exam 1:** about 5.3 core hours (Sat Sep 26 + Oct 2–5), plus about 2 bank-ahead hours. Adequate. The Sat Sep 26 proofs session is the one early block to protect. - **Risk to watch:** Oct 2–5 is 3–4 hours of study a day **plus Sim 3**, whose size is unknown. If Sim 3 turns out large, trim bank-ahead-style content first (the Fri Oct 2 335 redraw, the Sun Oct 4 345 proof rewrite). Keep all three mocks.

Day-by-day (Thu Sep 24 → Thu Oct 8)

Thu Sep 24 (today · class day)

- **Do not study during:** 9:30–10:45, 12:30–6:15.
- **Most attention:** CSC 345 **HW2 late window** (if not already submitted). Tracker showed No Submission past the 2:00 PM primary due — use the late window through Sat 2:00 PM.
- **After 6:15 PM only:** short 252 Test 2 binary triage (252-T2-binary, excerpt Deck 01 p.41, ~35 min) **if** 345 HW2 is already in; else HW2 first.
- Optional tiny 380 LOTP flash only if both HW2 and 252 triage are done (Quiz 04 due is NV — no countdown).
- 335 Quiz 1 window ended 12:30 today — past; do not invent another quiz.

Fri Sep 25 (no class)

- **Most attention:** Finish **345 HW2** if still open, then **252 Test 2 deep day** (2's complement + subtraction + Group A/C — see Test 2 Start Here). Start 252 HW2 binary problems in the same session; they reinforce each other.
- Then a real **337 A4** block (A4 is effectively due Monday night).
- Bank-ahead only if the above are on track: 345 Topic 1 (50), 335 intro/OOP/UML (45), 380 one Bayes table (25).

Sat Sep 26 (no class)

- **Hard cutoff 2:00 PM:** 345 HW2 late window ends.
- **After 2:00:** 252 Test 2 MIPS loops/arrays deep (90) **and** 345 Topic 2 counting + Big-O proofs (70, core — HW1 signal was proof completeness).
- 337 A4 in parallel — A4 outranks midterm study.
- Bank-ahead: 335 testing/classes2 (60) only after 252 + A4 progress.

Sun Sep 27 (no class)

- **Most attention:** 252 Test 2 blind retake + full-adder table (70); keep A4 moving; draft 252 HW2 and 380 HW03.
- Bank-ahead: 345 Master Theorem (excerpt Topic 2 p.68, 45), 335 lambdas (25, only after the 252 retake), 337 JS traps (25, only if A4 is nearly done).
- No invented 380 quiz due.

Mon Sep 28 (no class) — effective deadline day

- **Most attention:** 252 **25-minute timed paper mock** (Test 2 Start Here Mon row), then review misses.
- **Submit 337 A4 tonight.** Open the Gradescope page afterwards and confirm every file is there.
- **Submit 252 HW2 tonight.**
- Get 380 HW03 + HW03 Code nearly final.
- Optional 15-min 335 flash; check Gradescope/D2L for a posted 380 Quiz 04 due.

Tue Sep 29 (class day · heavy deadline day)

- **Do not study during:** 9:30–10:45, 12:30–6:15.
- **Only backup window before the afternoon deadlines:** 10:45 AM–12:30 PM.
- **Deadlines (order):** 1. **337 A4** by **3:30 PM** — should already be in from Monday; if not, submit in 10:45–12:30. 2. **252 HW2** by **7:00 PM** — should already be in; the 10:45–12:30 window is the backup, since 6:15–7:00 is too tight. 3. **380 HW03 + HW03 Code** by **11:59 PM** — finish and submit both after 6:15 PM.
- Study: **LIGHT only** after those submissions — 252 flash (Group A). No new 252 topics.
- After 6:15 PM: write 3 bullets on what the 335 week-6 lecture covered (JavaFX / Observer / Composite as lectured).

Wed Sep 30 (no class)

- **252 Asm 2:** finish by **5:00 PM** (safer side of the 5pm/7pm conflict).
- **Most attention:** LIGHT 252 active recall only (no new topics). Then 337 HTTP / Get&Post (337-M1-http, `getpost`, 50) for Midterm 1.
- Optional 10-min 380 Mock Quiz A if HW03 is in.
- 335 P3 still **NV** (not in D2L Assignments) — do not plan around it.

Thu Oct 1 (class day · 252 Test 2)

- **Do not study during:** class blocks.
- **Most attention:** CSC 252 **Test 2** during the 252 period (9:30–10:45 likely; clock NV). Calm buffer before 9:30 only.
- **10:45–12:30:** 337 HTML/CSS review (50) + 252 Test 3 "unverified" lecture bullets (15).
- **After 6:15 PM:** open the **Sim 3** spec (if posted) to gauge its size, then do a first session. Also write 3 bullets from the 335 and 345 lectures (week 6 content as taught).
- Thursday is mostly class, so this prep-order note is for the evening: 335 → 345 → 337 → 380.

Fri Oct 2 (no class)

- **Core:** 337 deep HTML/CSS/layout (80) · 335 intro/OOP/Classes 1 + UML redraw (70) · 345 Topic 3 basics + BFS/DFS (80).
- **Sim 3** session.
- 252 Test 3 stays **light** (continuity only). 380 midterm stays **light** / **date-NV**.

Sat Oct 3 (no class)

- **Core:** 337 forms/JS/DOM **if the week-6 lecture happened** (80) · 335 testing/classes2/lambdas (80) · 345 Dijkstra (excerpt Topic 3 p.40; MCST/topo only if lectured) (70).
- **Sim 3** session.
- No 380 midterm pass today; it moved to Fri Oct 9.

Sun Oct 4 (no class)

- **Core:** 337 **50-minute paper mock** + review (75) · 335 generics/collections/JavaFX **as lectured** (80) · 345 one proof rewrite (25).

- **Sim 3** session — aim to be feature-complete tonight.
- 252 Test 3 optional continuity flash only.

Mon Oct 5 (no class)

- **Priority: 337 first** (exam tomorrow): redo every Sunday-mock miss blind; client/server concepts (70). Stop 337 by evening.
- Then 335 **50-minute mock** (70) and 345 timed mock (Q1-Q8 in 15 min + PR1-PR3 and TR1-TR4 in 45 min) (75).
- Sim 3: testing/cleanup only if time; otherwise Tue night.

Tue Oct 6 (class day · 337 Midterm 1)

- **Do not study during:** class blocks.
- **Calm 337 buffer:** before 9:30 or 10:45–12:30 only.
- **Most attention:** CSC 337 Midterm 1 in the 3:30–4:45 window if held in class (75 min).
- **After 6:15 PM** (380 meets 5:00–6:15): **submit Sim 3** (target), then LIGHT 335 + 345 flash only.

Wed Oct 7 (no class)

- **252 Sim 3 due 7:00 PM** — should already be in; if not, this is the day's first job. No AI help, and do not use the Test 3 preview as Sim hints.
- **Most attention:** LIGHT mixed review for **335 Midterm** and **345 Exam 1** — **no cram**.
- Sleep priority over new topics.

Thu Oct 8 (class day · 335 Midterm + 345 Exam 1) — end of this cluster

- **Do not study during:** class blocks (252 still meets 9:30–10:45).
- **Calm buffers:** before 9:30 or 10:45–12:30 only. The 1:45–2:00 gap between exams is for water and a walk, not review.
- **Most attention:** CSC 335 Midterm (12:30–1:45 period; clock NV), then CSC 345 Exam 1 (2:00–3:15 period; clock NV). Same room Commons 305 — plan food/energy for back-to-back.
- No new topics. After 6:15: optional light 380 Quiz 04 / 252 Test 3 continuity — not required today.

After this cluster (pointers only — not densified here)

Item	When (Arizona)	Label
CSC 380 light midterm pass	Fri Oct 9 (35 min)	moved here from Sat Oct 3
CSC 345 PP2	Tue Oct 13 2:00 PM	confirmed syllabus
CSC 337 A5	~Tue Oct 13 3:30 PM	NV (absent from D2L Content)
CSC 252 HW3	Tue Oct 13 7:00 PM	rule-derived ("two days before each test"); not posted

Item	When (Arizona)	Label
CSC 380 HW4	Tue Oct 13 11:59 PM	when released
CSC 252 Asm 3	~Wed Oct 14	approximate ("on or about")
CSC 252 Test 3	Thu Oct 15	date confirmed; scope provisional — light guide
CSC 380 Midterm	tentatively Tue Oct 20 5:00–6:15 PM	date-NV — light guide; re-verify Oct 13–19; contingent plan in that guide

Tue Oct 13 is a class day with up to four deadlines (PP2 at 2:00 PM, which is when 345 class starts). Plan to finish PP2, HW3, and HW4 over **Fri Oct 9 - Mon Oct 12**, with Monday night as the effective deadline. This is only a pointer; build a proper plan after Oct 8.

Finals horizon (confirmed times — far; do not prep now)

Course	Final	Arizona time
CSC 345	Mon Dec 14	3:30–5:30 PM, Commons 305
CSC 252	Tue Dec 15	8:00–10:00 AM
CSC 335	Wed Dec 16	1:00–3:00 PM
CSC 337	Wed Dec 16	3:30–5:30 PM
CSC 380	Wed Dec 16	6:00–8:00 PM

Wed Dec 16 has **three finals back-to-back** (1:00–8:00 PM). Plan for that in November. These times are after Nov 1, so re-check them against the UA final-exam schedule (Arizona time) rather than any "PT" note.

CSC 380 Final Project: Fri Dec 11 vs prior Thu claim remains **Conflict** — hold until reconciled.

Guide index (human-named; dated twins on the box)

Assessment	Path (under study-guides/)
252 Test 2	csc252/assessments/CSC 252 – Test 2 Study Guide.{md,pdf}
252 Test 3	csc252/assessments/CSC 252 – Test 3 Study Guide.{md,pdf}
337 Midterm 1	csc337/assessments/CSC 337 – Midterm 1 Study Guide.{md,pdf}
335 Midterm	csc335/assessments/CSC 335 – Midterm Study Guide.{md,pdf}
345 Exam 1	csc345/assessments/CSC 345 – Exam 1 Study Guide.{md,pdf}
380 Quiz 04	csc380/assessments/CSC 380 – Quiz 04 Practice Guide.{md,pdf}
380 Midterm	csc380/assessments/CSC 380 – Midterm Study Guide.{md,pdf}

NV reminder: 252 Test 2/3 clocks; 335/345 Oct 8 clocks; 380 Quiz 04 due; 380 Midterm date; 335 P3; 337 A5+; 252 HW3 (rule-derived); Sim 3 size.

Review changes (Opus 5.5, 2026-09-24 evening)

- **Weekday fixes:** the title and horizon said "Wed Oct 8"; Oct 8, 2026 is a **Thursday**.
- **Tue Sep 29 made realistic:** A4 (3:30 PM) and 252 HW2 (7:00 PM) now target **Mon Sep 28 night**. Tuesday's only daytime window is 10:45–12:30, and 6:15–7:00 is too short.
- **Sim 3 got time:** it was due Wed Oct 7 but had no sessions. It now has sessions Thu Oct 1 evening through Sun Oct 4, and a Tue Oct 6 night submit target.
- **Added the Daily load table** (core vs bank-ahead minutes) and an "is the time enough?" check per assessment.
- **Class-block fixes:** Tue Oct 6 "after 4:45" is now after 6:15 (380 meets 5:00–6:15). The Oct 8 buffers now exclude 252's 9:30–10:45 block.
- **Order fix:** the light 380 midterm pass moved from Sat Oct 3 (heaviest day) to Fri Oct 9.
- **Added the Tue Oct 13 stack warning** and the Dec 16 triple-final note.
- **Time-zone warning:** "PT" labels upstream are only equal to Arizona until Nov 1.
- Removed the stale "leave repo named `begoneB0T/test` / no GitHub push" line. This copy is in private `begoneB0T/bob-jeff`.

Study aid only — not for submitted work. Personal study channel.
